# Vistra, Dynegy Investments Power PA Communities

By Colin Fitzsimmons and Brad Watson

**A**t Vistra, we do more than provide an essential product — electricity. It's important for us to be a good neighbor and corporate citizen. We are guided by our core principles, which include doing business the right way and caring about our communities. With operations in 20 states, including Pennsylvania, we are investing where our employees and customers live and work.

Since 2019, Vistra and our leading Pennsylvania retail electricity brand, Dynegy, have donated nearly half a million dollars to supporting community partners that are making a difference locally. That means investing in food pantries, schools, fire departments, homeless shelters and organizations that are focused on environmental sustainability, social justice and racial equity.

## Social Justice and Racial Equity

As part of a \$10 million commitment to support organizations that grow minority-owned small businesses, enhance economic development, and provide educational opportunities for students from diverse backgrounds, Vistra and Dynegy are partnering with the Urban League of Greater Pittsburgh and the Urban League of Philadelphia.

The Urban League of Greater Pittsburgh received \$75,000 to advance its Black Female Leadership Institute, which encourages young African American women to embrace leadership roles in their communities. The league is also using the donation to fund the Center for Economic Reliance, a service hub designed to foster individual career progression and improve educational outcomes.

The Urban League of Philadelphia received \$50,000 to fund its Entrepreneurship Center, which will help the organization assist small business owners with marketing efforts, provide one-on-one coaching to entrepreneurs, and offer business owners credit counseling and tax preparation services.

## Sustainability

In addition to serving millions of retail electricity customers across the country, Vistra is also the largest competitive power generator in the nation with a capacity of about 39,000 megawatts, powered by a diverse portfolio of natural gas, nuclear, solar and battery energy storage facilities. We are working to build a cleaner, sustainable and healthier environment as we transition our fleet to low-to-no carbon sources.

Breakdown of Vistra's donations in Pennsylvania since 2019.

Since 2002, Vistra has partnered with cities, counties, schools and nonprofits to provide more than 300,000 trees through our "Trees for Growth" initiative, which has helped to generate environmental savings
